Small Structure Used for Baking Cook Belonging to Keyes Products Company Destroyed.

A fire, which threatened to carry off the entire plant of the Keyes Products Co. in Palmetto, broke out Tuesday morning about 4:30 o'clock in a small building used as a bake room. The building was held with a good paper board. Fortunately the blaze was checked before it had a chance to communicate with the main building, but the structure in which the blaze originated was burned down and some stock destroyed. The loss will not be large, the estimate being under \$500.

No one knows just how the fire originated. It was seen about 4:30 a. m. by Charles R. Smith, who was preparing to go to work. He notified the fireman and watchman and alarm was rung. The blaze was extinguished in about half an hour.

The building which was destroyed was situated in rear of the new boiler house and near Oxbow brook. It was the most modern of the plant and the company had in contemplation its removal in view of the alterations to the plant.

Fireman Albert Babcock of the Keyes Products Co. had all in readiness, and a few lines of hose got the blaze under control, the fire being extinguished in about half an hour.

# Four Questions For City Meeting

Rescinding of 1902 Vote, Authorization of Over \$300,000 for Stony Brook Watershed Development, Authorizing Officials to Get Permit to Issue Bonds for This Amount, and to Cover the Floating Debt—late is Next Wednesday.

On Tuesday Mayor Thayer called another special city meeting for next week, the call being for next Wednesday evening, instead of next Tuesday evening, the date he expected to call on when speaking of it Monday evening.

There are four matters in the call, the first being on the rescinding of the vote of 1902, when the city meeting voted not to go to Stony Brook for an increased water supply. The second matter concerns the authorization of an appropriation of a sum to exceed \$300,000 to enable the board of water commissioners to proceed with the establishment of a reservoir at Stony Brook, with the necessary pipe line.

The third matter is the authorization to decide whether to instruct the proper officials to proceed with the obtaining of the necessary permits for the raising of the money, and, fourth, to vote to decide whether or not the proper city officials will be authorized to obtain authority from the legislature to issue bonds to refund the present floating debt of the city.

The last annual report of the city treasurer showed the bonded debt of the city to be \$335,000, the total debt then being \$1,030,300. The sinking fund at that time, last May, amounted to \$144,300, the net debt about \$1,028,000.

Since then there has been additional loans, including the vote of \$20,000 for the Trading company station.

Reservoir Gains an Inch.

The measurement of Fairview reservoir on Tuesday showed that it had gained an inch since Monday, being 339 inches below high water mark, the large pipe having taken the water from the brook, so that it is now down to slightly less than a full pipe. Moderate weather will, however, serve to turn the snow into water and a steady flow into the pond is expected.
